Custom Safety Netting Solutions

**BayNets™**

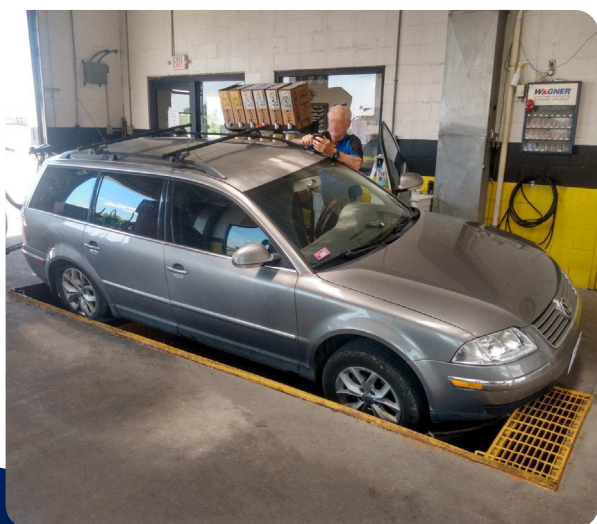

## SERVICE PIT SAFETY SYSTEMS

BayNets Systems are made for cars, buses, trucks, trains and all fleet maintenance facilities. With its non-snag, easily retracted system, a pit can be accessed from either end of the bay. For over 25 years BayNets has been a trusted system used by Jiffy Lube, Penske Truck, NY City Transit, Amtrak and so many others.

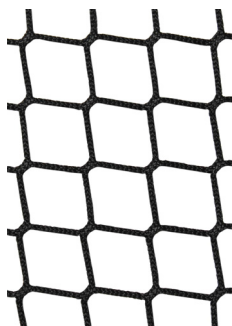

- No Heavy Grates
- Free-Sliding Hardware
- No Jammed Webbing
- Holds Up to 3 Tons

Add an enhanced level of safety to any vehicle service facility by protecting personnel from injury caused by accidental tripping, slipping or walking into an open pit. If your facility has service pits, you must comply with OSHA regulations by regularly using a protective covering or guard to prevent dangerous falls into the pit.

### MATERIALS

InCord N820BK is knotless netting with a 2½ inch square mesh. Knots are eliminated using a balanced knitted construction with filaments running continuously throughout the netting to enhance strength and durability.

HTPP fiber is highly resistant to abrasion, is light weight, and is resistant to moisture and chemical exposure.

We provide detailed instructions and an installation video that allows easy set-up in about an hour. That means less down time for mechanics.

The BayNets Safety System is highly adaptable and can be customized to fit any bay.

## COMPLIANCE MATTERS

InCord's mission is to keep all service bay workers safe – no matter what type or size of vehicle they work on. In addition to automotive and truck maintenance pit safety netting, we've designed a line of BayNets specifically for maintenance safety in bus and rail service bays.

BayNets for bus and rail are custom designed for extra width and length as well as for partitions, crossover areas and multiple bay access entry.

SAFETY IS A TOP  
**PRIORITY**

- Automotive
- Freight and Truck
- Bus, Transit, Subway, and Trolley
- Railroad and Train Station

## ATTACHMENT OPTIONS

Aircraft grade cable and hardware provide unmatched strength to the BayNets System and InCord provides you with all you need to have yours installed and operational quickly and easily.

Contact an InCord netting expert directly for detailed specs and to determine the best hardware and configuration for your service pit safety system.
