Theatre Safety Netting Placement Guide

 Highlighted areas benefit from InCord Theatre Safety Netting Solutions.

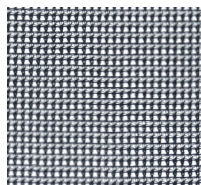

Each theatre setting has unique safety requirements. Speak with a Theatre Safety Netting Expert for a safety inspection or to determine the best products and placement to keep everyone safe.

Theatre Safety Netting Materials

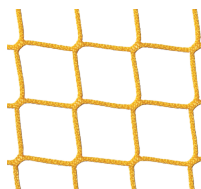

OPN Netting: N820

- High Tenacity Polypropylene Knotless Netting
- Low stretch, high tension
- Available with optional liner

OPN Scrim: WS70

- Fine mesh (1/8")
- Light and noise reduction
- Breathable

Stage Guard: M1250YL

- High visibility yellow mesh
- Bordered with a Dyneema® tension rope
- Easily deploys and stores compactly

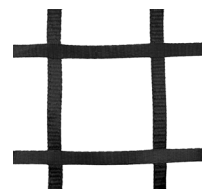

Catwalk & Light Cage Netting: M1250

- High Tenacity Polypropylene Knotless Netting
- Low stretch, high tension
- Capable of preventing falls as a barrier

Catwalk & Light Cage liner: DNR900

- Small mesh (3/8")
- Contains smaller objects
- Use as liner or primary net

Loading Dock Net: NF200BK

- Provides open-edge fall protection
- Cam buckle terminations tension quickly
- Deploys easily and stores compactly

Note: These are only a few of InCord's most common material options. Contact your InCord distributor for a safety inspection and recommendations.
