

InCord

Custom Safety Netting Solutions

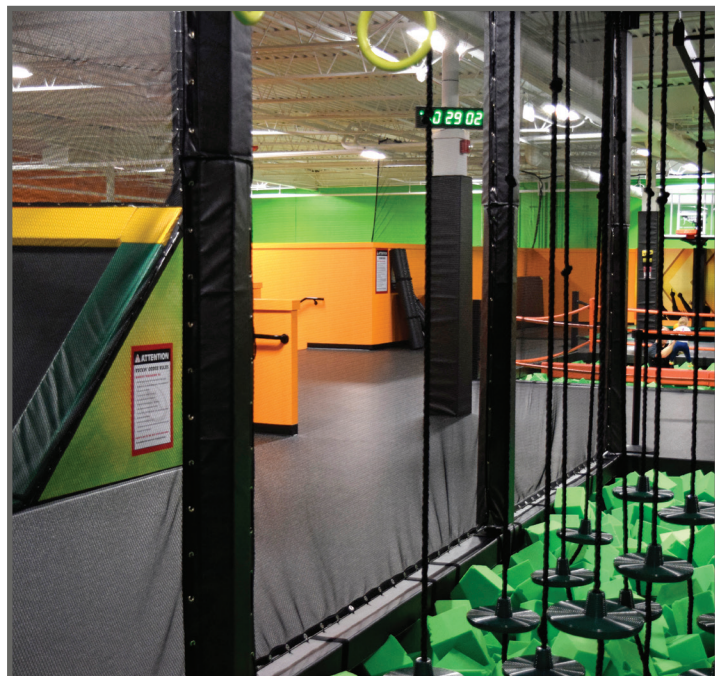

Trampoline Nets

COMPLETE PROTECTION

Trampoline beds wear out and can tear through unexpectedly, endangering patrons. InCord provides netting designed to arrest a fall in as little as three feet and is a highly cost-effective solution for added safety.

Impact-absorbing netting from InCord is specifically designed and tested for trampoline safety. From under-bed to full court containment, our netting products are tested to comply with ASTM F2375-09 and ASTM F2970-15.

- Abrasion Resistant
- Custom Designed
- ASTM Compliant
- New or Retrofit Systems

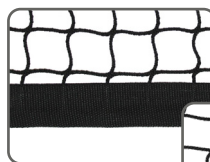

BORDER OPTIONS

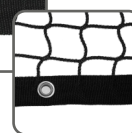

WEB BORDERS

2" polyester webbing shown on N820BK.

3" polypropylene webbing shown on N4203BK FR.

Grommets are available on netting with web borders.

Please note that InCord offers a wide variety of border and finishing options depending on your specific application. This is only a small sampling. Our team works with you to create the solution you need.

TESTED AND PROVEN

Well placed netting can prevent access to areas under platforms and stairs or under trampoline beds while maintaining airflow. Protection around these areas is critical to minimizing risk. Keep guests from venturing into unauthorized areas with minimal visual impact.

InCord specializes in the science of netting and we understand the importance of safety compliance for your trampoline facility. Our netting products are tested to meet or exceed ASTM F2375-09 and ASTM F2970-15 standards.

FULL COVERAGE
SYSTEMS
