Custom Safety Netting Solutions

Aquatic Netting

## INTRODUCTION CUBES

Introduction Cubes let newcomers adjust to their surroundings safely. Lightweight and gentle to marine life, InCord net material is made to last in high-moisture, extreme environments. That means a long lifespan for years of use in aquariums anywhere.

- Non-toxic materials for use in sensitive environments.
- Resistant to water, salt and UV degradation.
- Cubes may be reconfigured to add extra space for larger or more plentiful wildlife.

Easily assembled and simple to maintain, net panels can be quickly repaired or replaced either by a member of your own staff or by InCord netting experts. Optional hook and loop hatches can also be added for ease of access. Work with InCord engineers to design the perfect solution for safely adding new life to your aquatic exhibits.

Single Cube

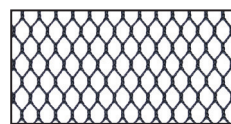

### MATERIALS

Our custom netting is available in a variety of mesh sizes and colors to suit your specific needs.

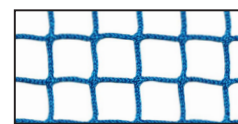

Depending on the size of the marine life you are looking to contain, our netting experts work directly with you to determine the best materials to complete your introduction cubes.

WS70 (Non-FR)  
1/8 inch mesh

1/4" x 3/8" Mesh Liner

N371  
3/4 inch mesh

Our unique design allows for your Introduction Cubes to be reconfigured to any size or layout by attaching additional structural components and net panels. Net attachment options include hook and loop latches or reusable cable ties for maximum versatility. When not in use, cubes can be quickly disassembled and compactly stored.
