Steel Wire-Rope Netting

InCord®
Custom Safety Netting Solutions

With Dralo Wire Rope Netting, safety meets style. Dralo netting is made from high-quality wire rope, ensuring durability and long-lasting performance. Its sleek and modern design adds a contemporary touch to any space, making it a perfect fit for both indoor and outdoor environments.

Dralo wire-rope netting is ideal for commercial, industrial, amusement, and sports applications.

- Banister, Fencing and Railings
- Sports and Safety Applications
- Animal Enclosures
- Heavy Duty Containment

Dralo Wire Rope Netting offers unparalleled transparency, designed to provide a secure barrier without obstructing views. Dralo wire rope netting offers a seamless blend of form and function, from balconies and staircases to bridges and stadiums.

Steel wire rope netting can be easily customized to fit different project requirements. It can be tailored to various shapes, sizes, and configurations to suit the specific needs of your space.

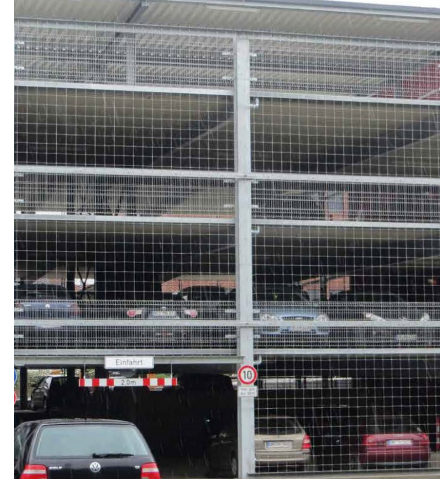

This flexibility allows for unique designs, making it a versatile choice for architectural, and landscape applications.

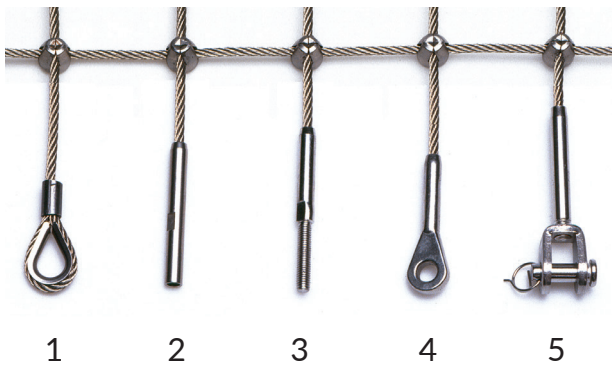

Not only does Dralo Wire Rope Netting enhance the aesthetic appeal of any space, but it also offers reliable safety. It's ideal for preventing falls, protecting against unwanted access, and ensuring the safety of people and animals. The all-metal construction provides low deflection under heavy loads, requires no maintenance, and is suitable for the extremes of harsh environments.

Dralo at a glance:

- Three versions available:
 1. Galvanized wire ropes and aluminum crossover joints
 2. Stainless steel cables and aluminum crossover joints
 3. Stainless steel cables and stainless steel crossover joints
- Wire Rope diameters range from 1/16" to 5/16" (1 to 6 mm)
- Mesh sizes range from 3/4" to 12" (20 to 300 mm)
- Continuous net lengths are available in widths up to 16 feet (5m).
For larger widths, multiple net panels can be hand-coupled for optimal results.
- Net anchors with wire loop ends or with optional wire end fittings

The Dralo nets come with the option of factory-assembled stainless steel end fittings. The tensile strength of the fittings matches the strength of the cable.

1. Looped Eye
2. Female Threaded Fitting
3. Threaded Fitting
4. Eye Fitting
5. Shackle Fitting

Available Mesh Diameters (mm) by Cable Size (mm)

Cable Size (mm)	Mesh Diameter (mm)
