

GreenScreen™

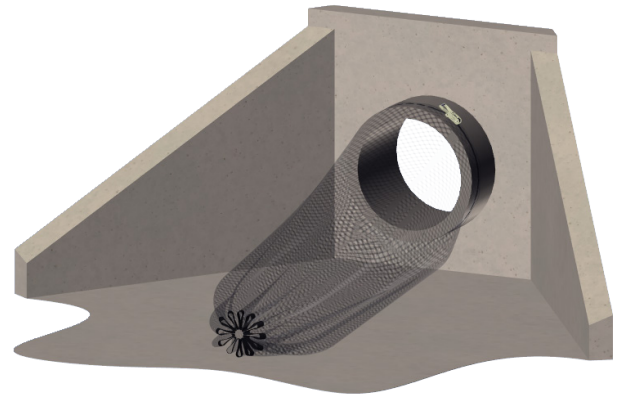

Debris Catcher for Stormwater Outlets

InCord®
Custom Safety Netting Solutions

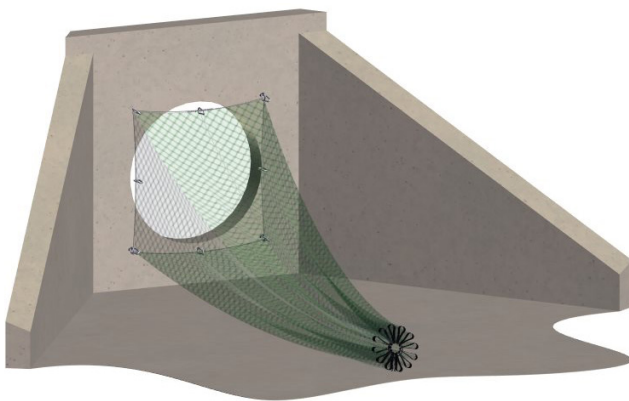

InCord GreenScreen™ Drainage Nets effectively capture and prevent debris and litter from entering stormwater systems by affixing them to drainage outlets. As stormwater flows through the nets, they trap items such as food packaging, cans, leaves, sediments, and other organic matter. Once the nets become full, they can be easily detached and emptied.

Constructed from high tenacity polypropylene, drainage nets are highly durable and can withstand robust water flow.

- Commercial-strength material
- Custom sizes available
- Easy to install & maintain
- Variety of attachment options

Available in two mounting configurations: flush mount and collar mount. Storm Drainage Nets can be custom designed with different size netting for various uses.

Choose from Black or Green netting to suit your specifications.

InCord is Certified Platinum
